

Congressional Candidate Pledge to Eliminate Medicaid's Institutional Bias

I understand that Medicaid's institutional bias violates the right of people with disabilities to live in the Most Integrated Setting, is an outdated approach to meeting the needs of seniors and people with disabilities, and unnecessarily increases spending on long term services and supports. The Community Choice Act is legislation which eliminates the institutional bias and gives people a Real Choice where they received long term services and supports. As a Congressional Candidate, should I be elected:

- I publicly pledge my support for eliminating the institutional bias during the 112th Congress and agree to become an initial co-sponsor of the Community Choice Act if the legislation is written as it was introduced during the 111th Congress (S683/HR1670).
- I publicly pledge my support for eliminating the institutional bias during the 112th Congress and agree to become a co-sponsor of the Community Choice Act if the legislation is written as it was introduced during the 111th Congress (S683/HR1670).
- I will not become a co-sponsor of the Community Choice Act, but publicly pledge my support for eliminating the institutional bias during the 112th Congress and agree to vote in support of this legislation if it is written as it was introduced during the 111th Congress (S683/HR1670).
- Even though I do not support the Community Choice Act, I publicly pledge my support for eliminating the institutional bias during the 112th Congress.
- I do not support the Community Choice Act, nor do I support eliminating the institutional bias.
